We are immensely grateful to You for choosing our product. We hope that you will be satisfied with our work and it will help you in your design.

Tutorial

Step 01 : Unzip and open the PSD file.

Open the psd file in Adobe Photoshop and have a look on the layer palette:

01_Smart object "Design" layer (to apply the design)

02_Change the image lights

03_Adjust colors of object

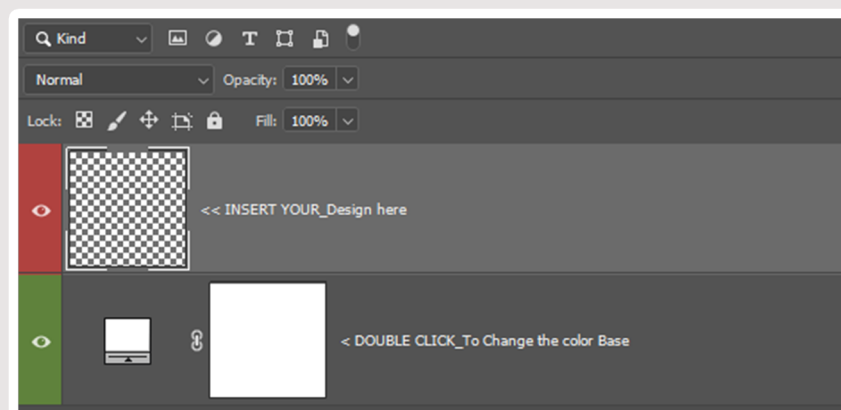

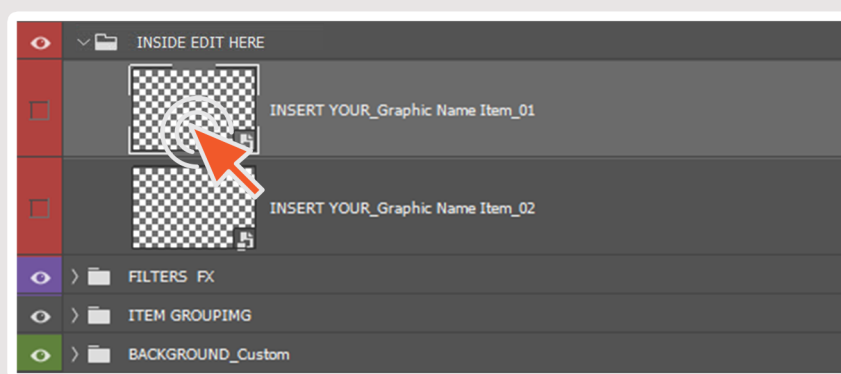

04_Light and Shadows. Show it and play with it's opacity to add an more realism to the image

Works great with dark and dense patterns.

(If you're having trouble finding a certain layer, simply click the eye icon to switch its visibility)

Step 02 : Edit the PSD file. Add you design via smart object

Look for the Smart Object (Insert your graphic) and open it by double-clicking the thumbnail. By doing this, a new Photoshop window will be opened, athe frame your design will be imported into.

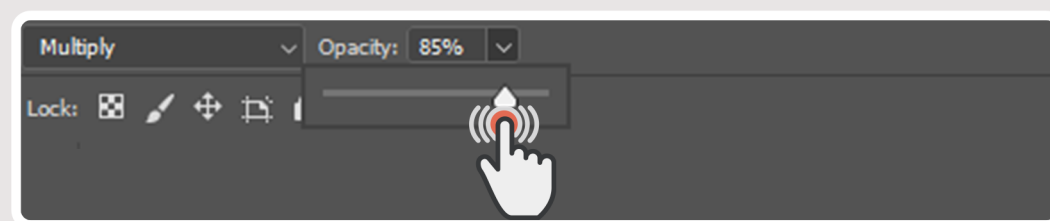

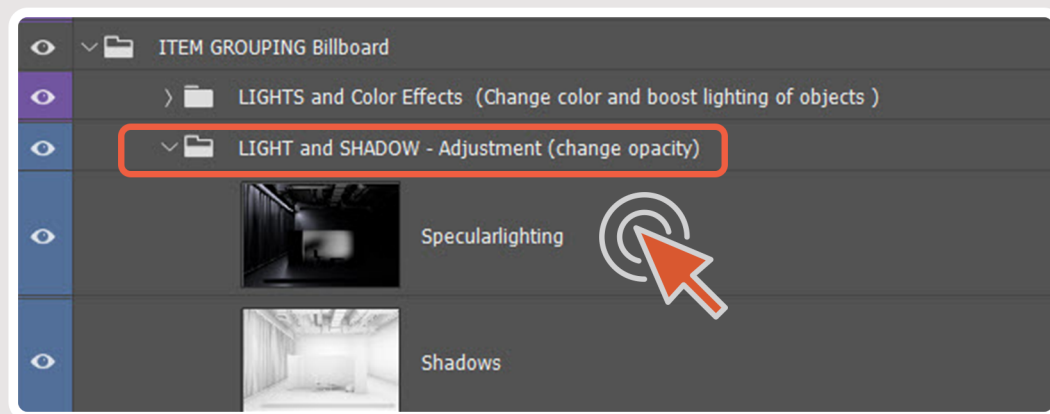

Open the artwork in Photoshop and simply drag and drop it to the new opened window (.psb file), then transform it to fit the canvas.

After editing save (CTRL+S, Command+S) and close (CTRL+W, Command+W) the .psb file.

Step 03 : Play with "More Shadows and lights"

Go to the "Light and shadows - Adjustment" group and adjust its opacity. This is a great tool when working with darker or more intricate designs.

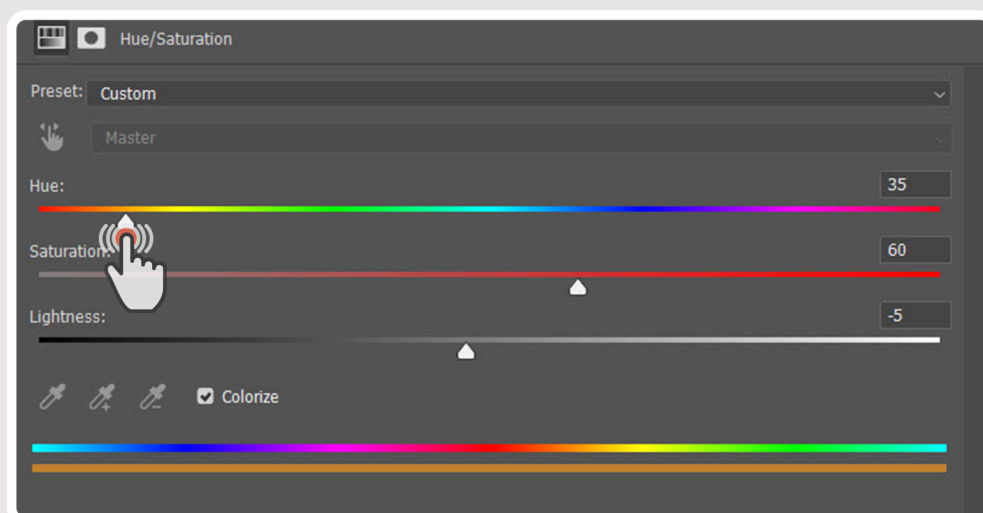

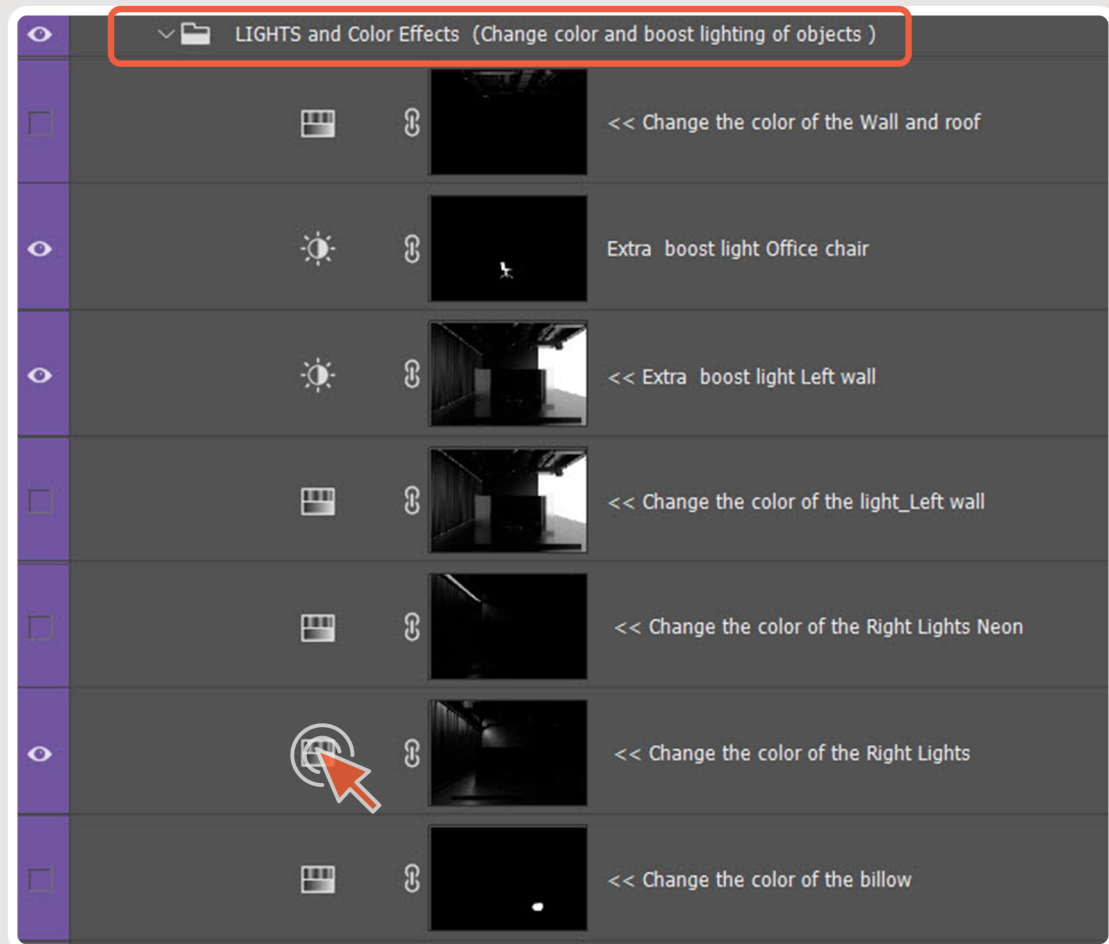

Choose the "Specularlighting" group and adjust the opacity. It's a good idea to make the setting higher in darker scenes.

Return to the source PSD file and the modifications you made will be visible.

Step 04 : Adjust colors of object

Doubleclick one of the color layers and pick the color you prefer. In this mockup file you can change color object

“

Experiment with levels once you are done with the smart object editing to achieve the desired brightness and contrast. Play with Blend Mode, Colors and Saturation to achieve best effect. You can crop the image to achieve different looks.

We are immensely grateful to You for choosing our product. We hope that you will be satisfied with our work and it will help you in your design.
